Dear Sir:

I realize that television is a powerful influence to our children.

I request that television programs be planned using educational guidelines, depicting high moral standards.

Our children are our country's future. They should be given special consideration.

Very truly yours,

(Mrs) Nannie Chandler

The Honorable Fred Hundt

Dear Mr. Hundt,

I'm writing in regards to our children's television.

Our children are our country's future. We need to stop and think and consider what we are doing to them.

Our schools seems to be in trouble. There seems to be a shortage of funds and school rooms are over crowded. So many can not read and drop outs is a serious problem.

There seems to be room for vulgarity, sex and guns also gangs but no room for family love clean living.

There are some good programs that have been developed. We need more.

A. off these program have to be shown why can't it be at a different time, like late at night or not at all

Please clean up our T.V. These children will be ruling the world in the next twenty or thirty years

Sincerely and Thank you

Mrs Blanche B. Roberts

Sir,

Since TVs are found in almost all homes in America, even socially deprived people have an opportunity to help educate their children at an early age. Therefore, I would strongly suggest urging the FCC to make a firmer stand & put some teeth into the guidelines of the Children's Television Act of 1990 - making the programs at more appropriate times, say 7 to 9 am & 3 to 5 pm and, of course, appropriate for their ages. It might help to suggest what is of educational value, not just some junk to fill in.

You & I know children are our most precious resource and TV can be a wonderful influence for their good as well as others.

Sincerely,

Mario Saenz

Dear Sir:

As a member of the National Family Community Education organization, I am writing you in regard to the Children's Television Act of 1990. It is important to the future of our country that the children of today are exposed to more and better educational programs on television.

We all know our schools are underfunded and in trouble, but we also know that children from the time of birth are exposed to television. Television has a powerful influence on the children today, and I am thinking the influence is not positive.

I would encourage you and ask you to use your influence for more and better educational programs to be aired at times when children are watching. I would also stress that many programs should be discontinued. I know you will agree that many are not suitable for young developing minds.

Thank you for your support on this problem. We as a nation must put the needs of our children's educational development first.

Dear Sir,

I am writing in regard of the Childrens Act 1990 of TV. I am really concerned about the programs that are being aired on TV. This is a huge baby sitter for many many children, and I feel we could use it to better educate them along with young adults. I keep Foster Children that have been abused in many ways. Those that have come from that situation does not need to see the way we portray sex on the tube set. Please Challenge our writers to change their ways and make good clean shows and more with education in them. Its up to us, the adults to care about our future generation and this is the biggest way to start. I thank you for your time.

Sincerely,

Pat Leonard CAFCE Member,
